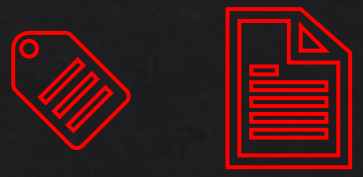
Overloaded Processes

Ticket Based Development



Too Many Metrics

Problems

NWOW & OWT

Funding	Traditional– Initiative/Project Focused
Architecture / Design	Centralized & Committee Based
Governance	Overloaded Documentation, Processes
Risk & Audit	Paper/Document/Spread Sheet Based
Delivery Teams	Expectation to go faster

Problems

Business	Technology
Customer Success Unit	Middleware Team
Operations Unit	Architecture Team
Risk Unit	Analytics Team
Finance	Data Team
Strategy Unit	Front-end Team
Planning Unit	Operations Team
Capacity Unit	Network Team
Sales Unit	Dojo Team
Portfolio Unit	QA Team
Service Unit	Security Team

Challenges

@LBMKRISHNA

Paradigm Shift

If you can't describe what you are doing as a value stream, you don't know what you're doing.

- Karen Martin & Mike Osterling

Solution

Paradigm Shift

Whenever there is a product for a customer, there is a value stream. The challenge lies in seeing it.

- MIKE ROTHER, JOHN SHOOK
Learning to See

Paradigm Shift

A value stream is an END-TO-END set of activities which collectively creates VALUE for a CUSTOMER.

- James Martin
  The Great Transition

Solution

Paradigm Shift

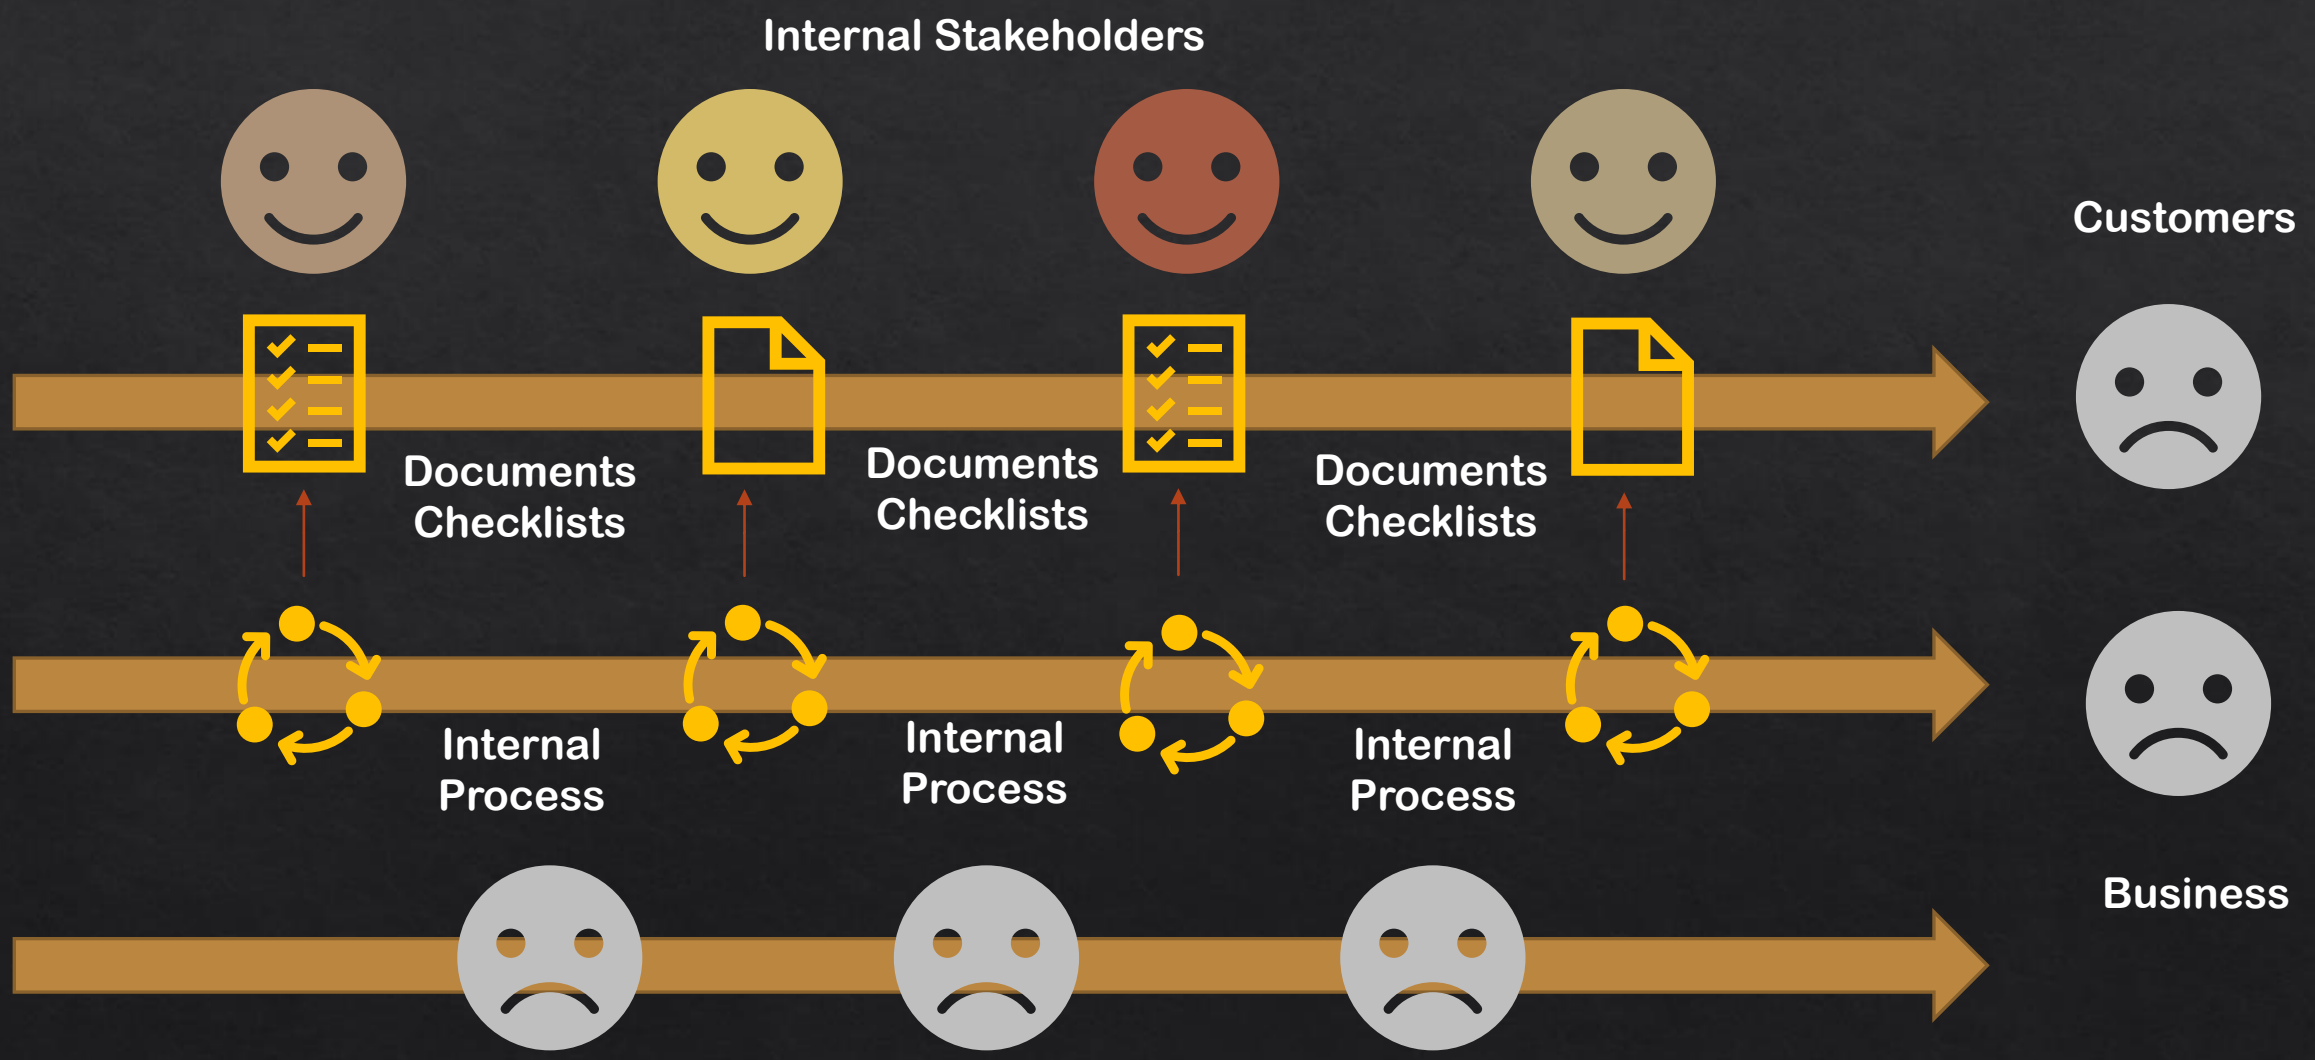
A value stream is an **END-TO-END** set of activities which collectively creates **VALUE** for a **CUSTOMER**.

Solution

Value Stream

Solution

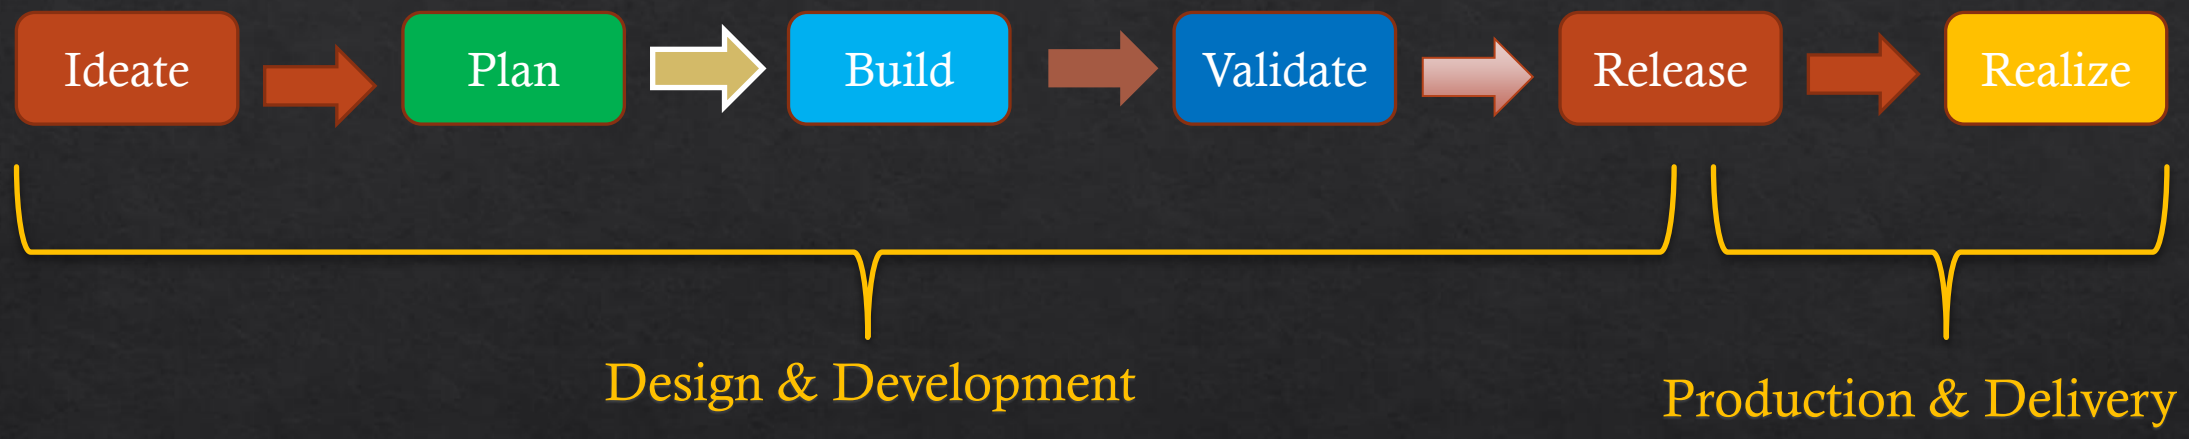
The Disconnect



Challenges

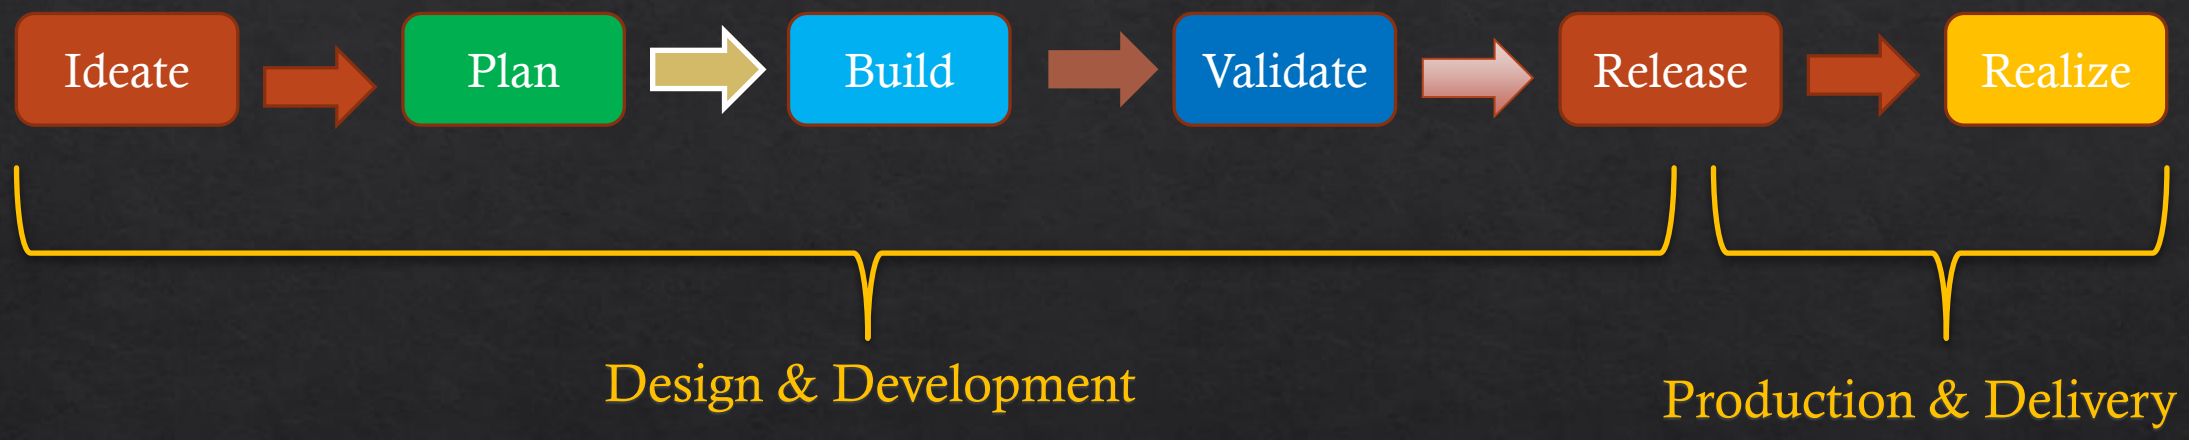
@LBMKRISHNA

Value Stream Mapping



Solution

Value Stream Mapping



Ask Questions:

Value Add Activity

Non-Value Add Activity

Non-Value Add but Non Negotiable

Solution

Optimize for Flow

- Value Stream (Identify, Map, Manage)
  - Process Flow
  - Material & Information Flow (Documents, Artefacts)
  - Connected Toolchain
  - People & Their Roles

Solution

Make the Work & Flow Visible

- Understand the type of “Work”
- Make the “Work” visible
- Make the “Dependencies” visible
- Organisational consensus about “Flow”

Solution

Measure What Matters

"Measuring only one area of the value stream is like only using two inches of a 12-inch ruler."

- John Willis, Senior Director, GTO Red Hat,
Co-author of The DevOps Handbook

Solution

Measure Flow

- Developer Experience

Solution

"Any" Transformation
is about
"Cultural" Transformation
@LBMKRISHNA

Recommended Approach

- Understanding current state (Tools, processes, roles, flow)
- Making work visible (current workloads, workloads in pipeline)
- Work Type (New feature, Tech debt, Incident, Risk)
- Upskilling (DevOps, CI/CD Practices, Automation)
- Investment (Education, Time, Tools, Self-service)
- Role play

Overcoming Enterprise Disconnect

- Instead of all working to achieve our own goals, **we work towards organizational goals.**
- Instead of working against each other and pushing our own priorities/agenda, **we all work together to achieve better outcomes for our customer and business**.
- Instead of focusing just on "project timeline & budget", **we work towards delivering value.**
- Instead of mapping our strategy to structure, **we work towards regrouping and organizing our teams to map our strategy & centred around "Customer" and "Value"**

Call for Action

The most critical metric is: how long it takes for an innovative idea to reach a customer

- Adrian Cockcroft, Vice President of Cloud , AWS

Overcoming The Enterprise Disconnect
