Why Value Stream?

Why Flow Metrics?

My Reflection

What is your role purpose?

What is your organization purpose?

Why is the work you do important?

Why Value Stream?

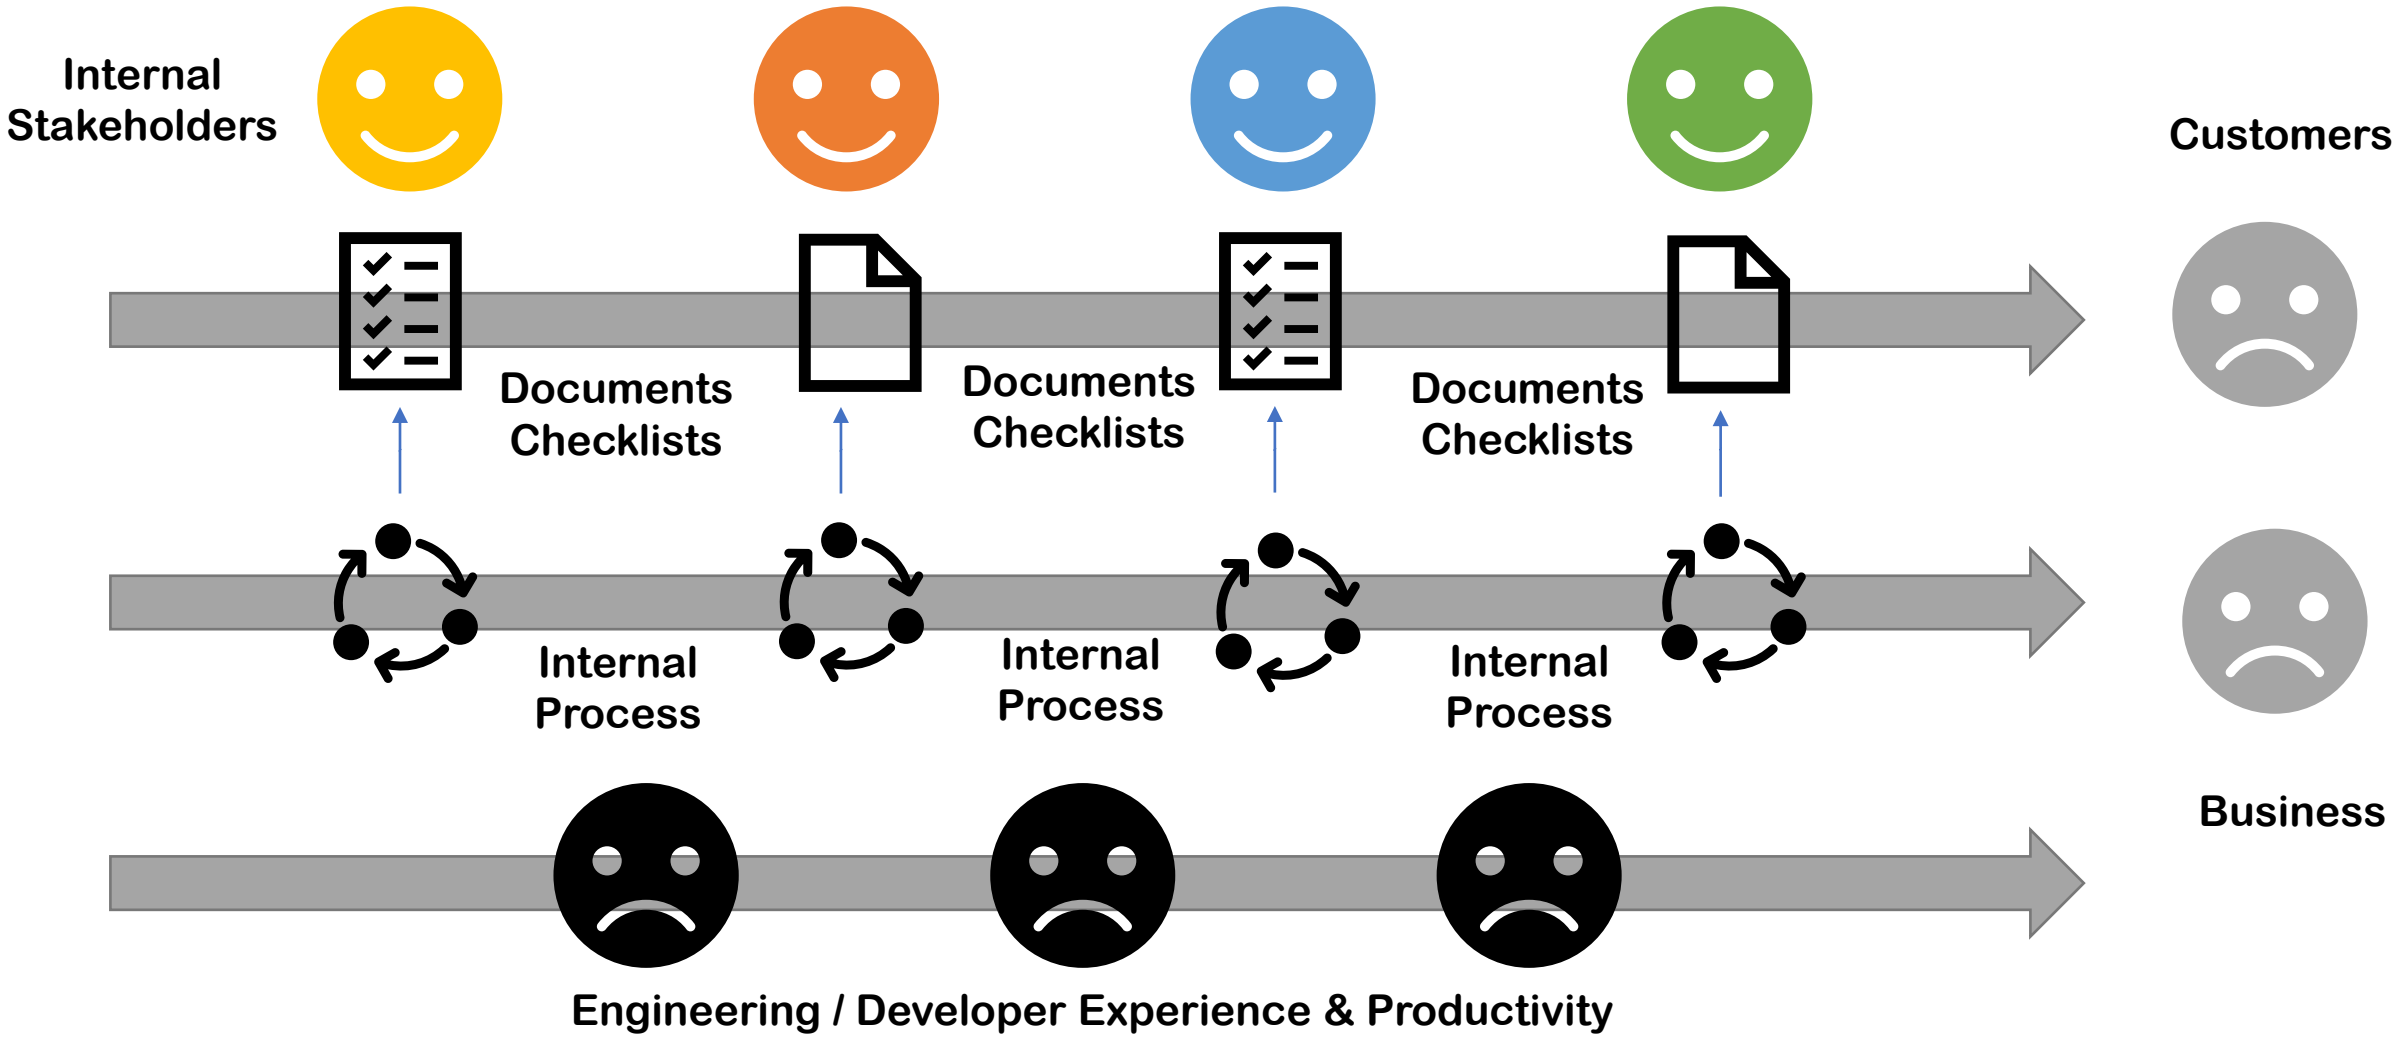
Why Flow Metrics?

My Reflection

Organizational Silos – Need for Value Stream

Funding	Traditional– Initiative/Project Focused
Architecture / Design	Centralized & Committee Based
Governance	Overloaded Documentation, Processes
Risk & Audit	Paper/Document/Spread Sheet Based
Delivery Teams	Expectation to go faster

Disconnected Organization - Need for Value Stream



Why
Value Stream?

Why
Flow Metrics?

My
Reflection

Why Flow Metrics

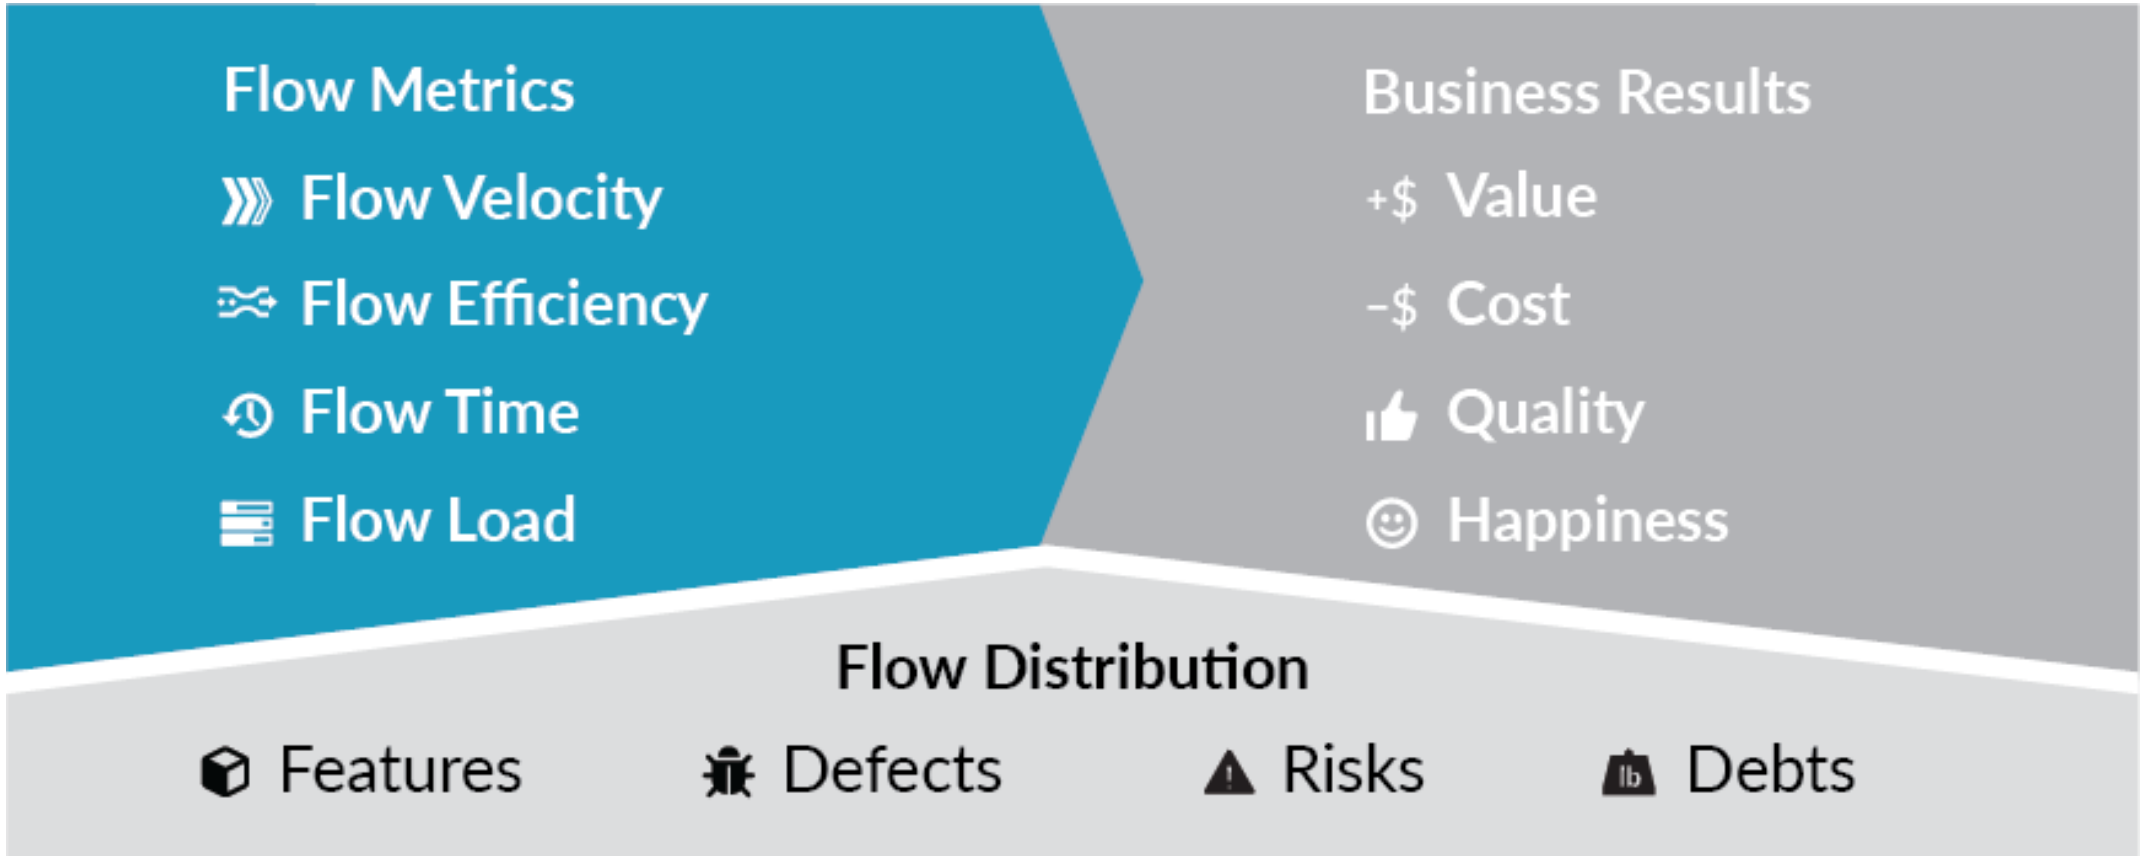
Unique set of end-end metrics

Per Value Stream

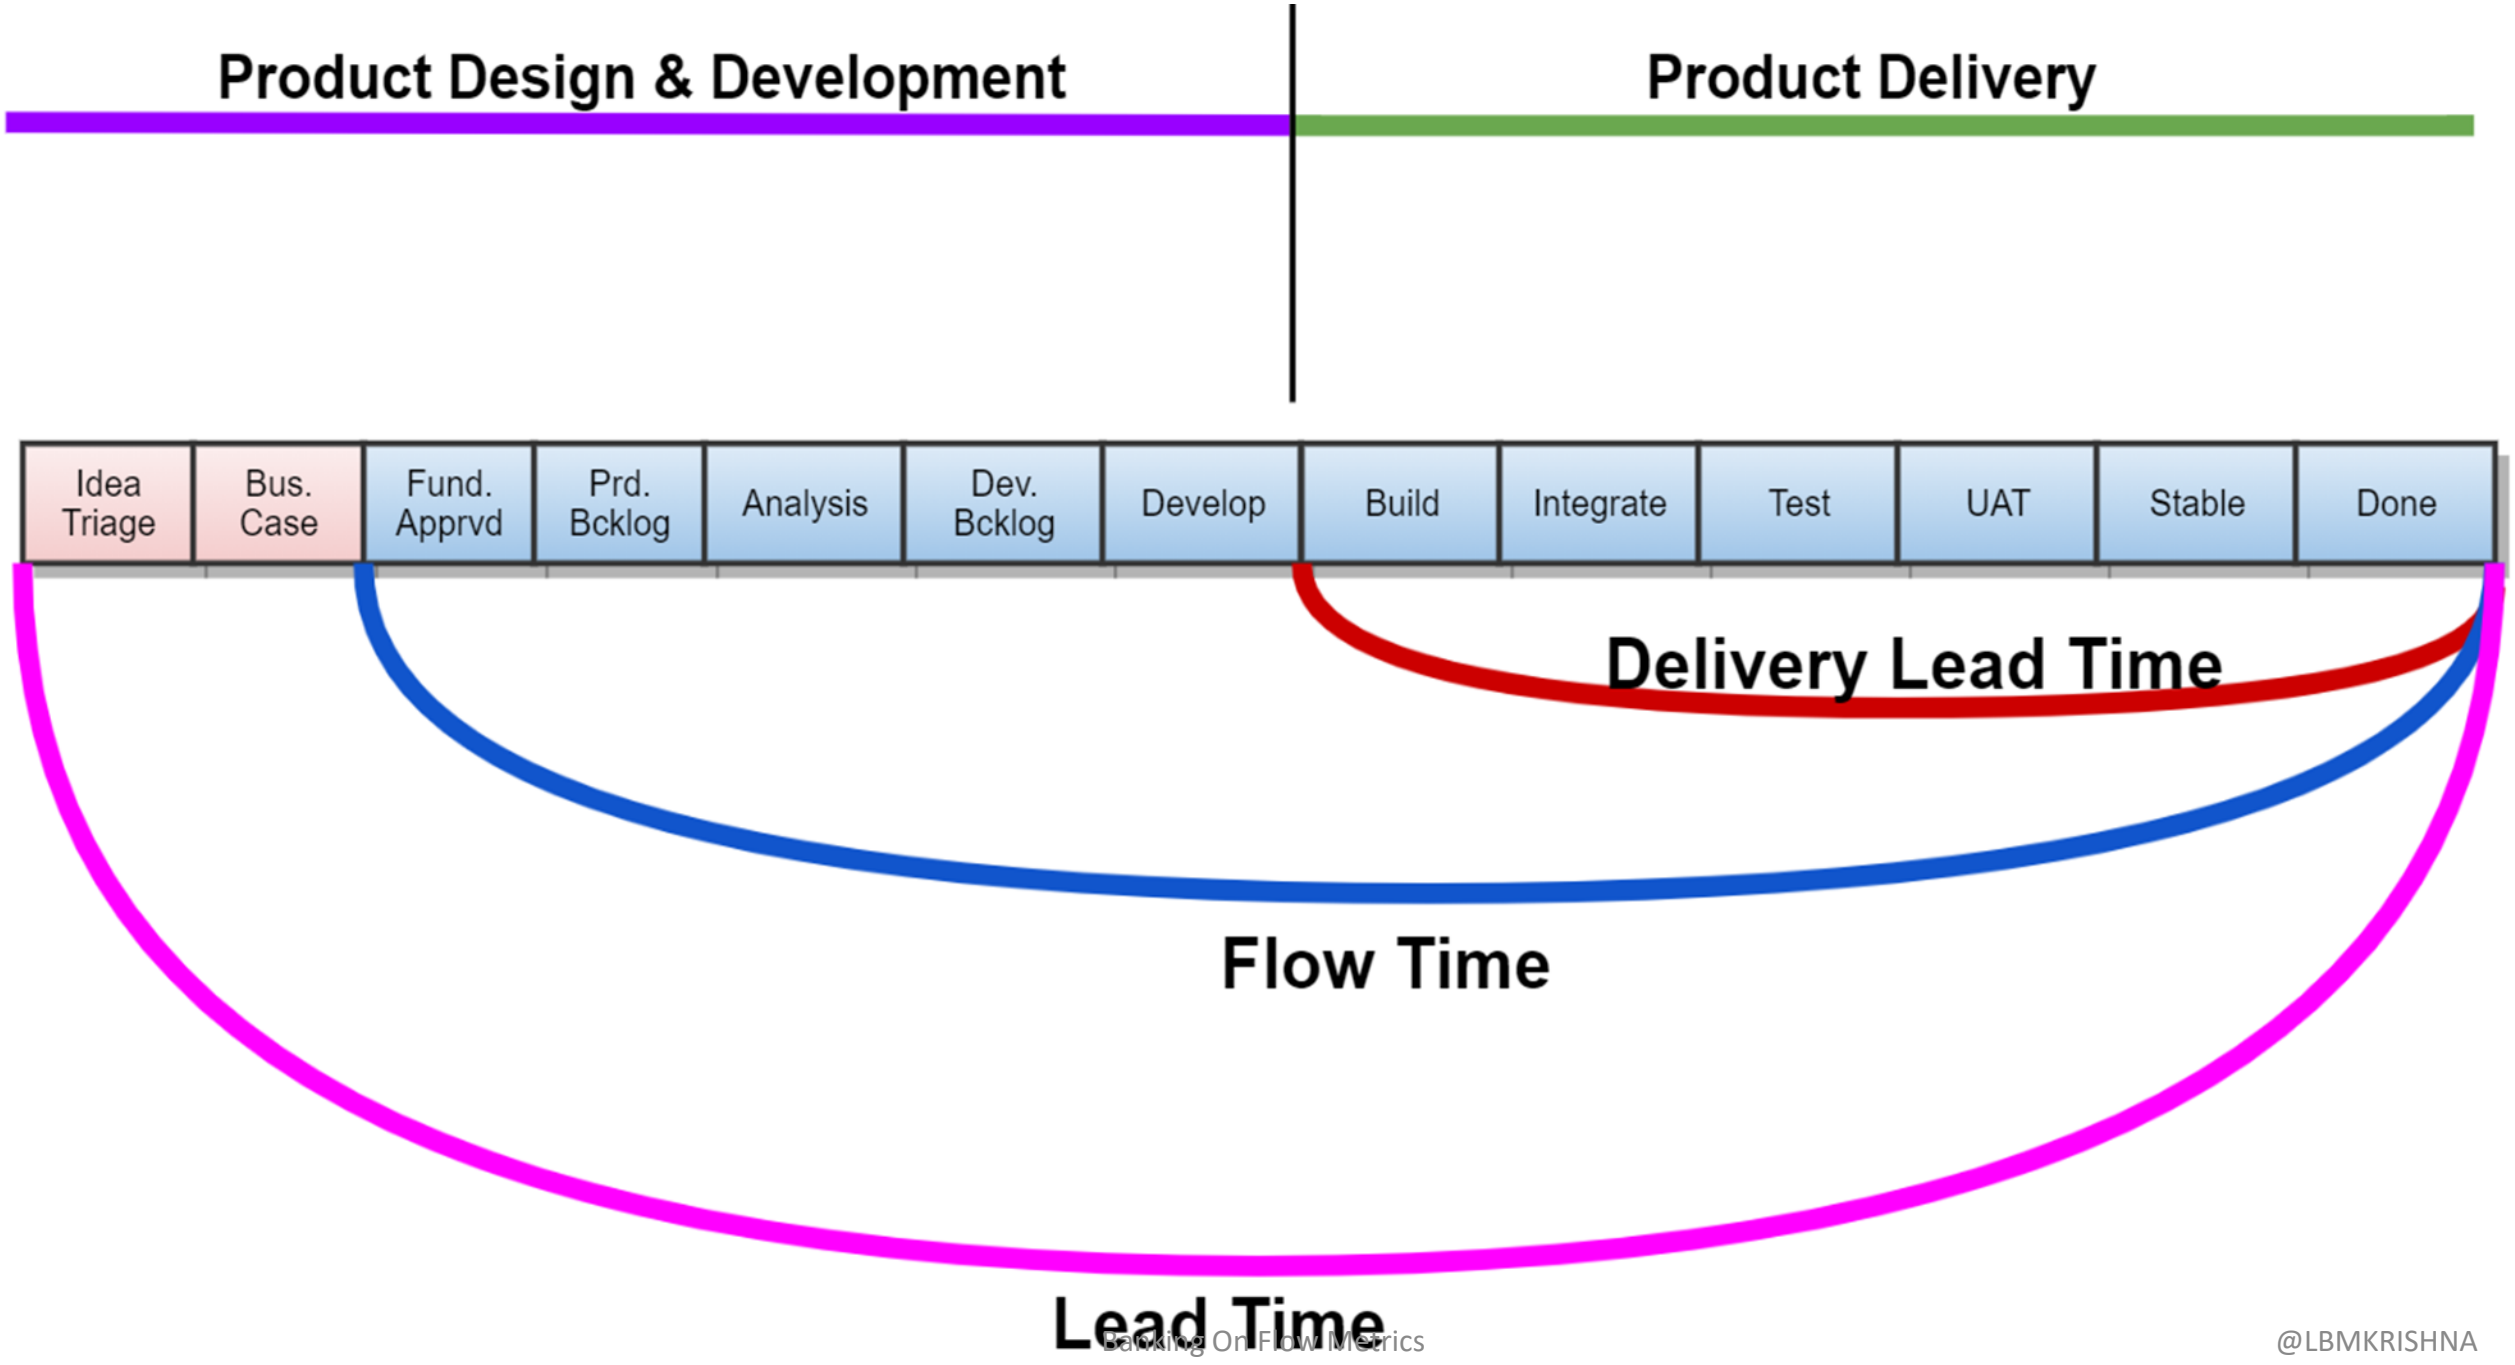
Are tied to business value

Are based on outcomes

Provide a feedback loop to improve decisions



Flow Metrics
Flow Velocity
Flow Efficiency
Flow Time
Flow Load
Business Results
+$ Value
-$ Cost
Quality
Happiness
Flow Distribution
Features
Defects
Risks
Debts



Product Design & Development
Product Delivery
Idea Triage
Bus. Case
Fund. Apprvd
Prd. Bcklog
Analysis
Dev. Bcklog
Develop
Build
Integrate
Test
UAT
Stable
Done
Delivery Lead Time
Flow Time
Lead Time

Business Results

+$ VALUE		-$ COST	
Revenue	$1,200,000	Cost of FTEs	$850,160
# of Renewals	120	CAC	$200
# of New Sales	190		

QUALITY		HAPPINESS	
Escaped Defect Ratio	5%	eNPS	7
Production Incidents	11	Turnover Rate	9%

Edit | View Details

Flow Efficiency

17%

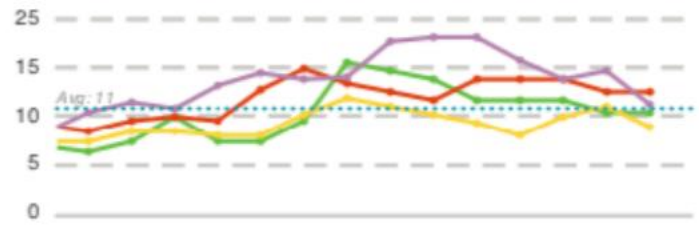
% of cycle time spent in active states

Help | Find Bottleneck

Flow Time

18

days to close a flow item, on average

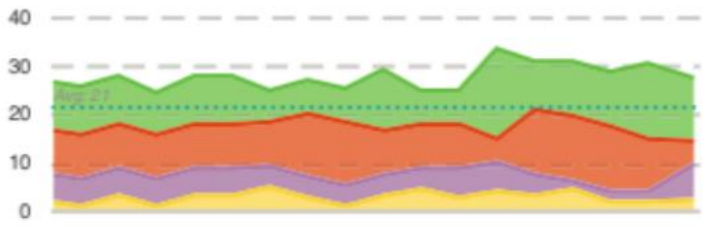


Help | Analyze Speed

Flow Velocity

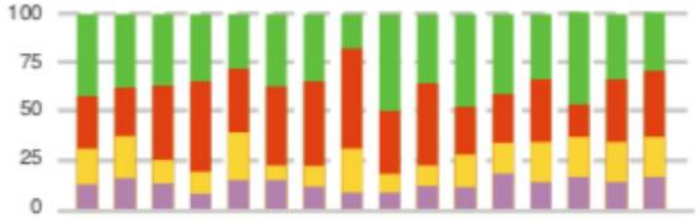
682

flow items completed



Help | Explore Throughput

Flow Distribution

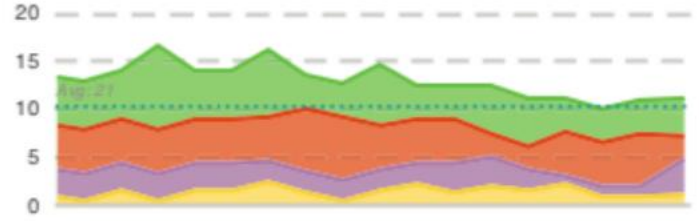


Help | Review Allocation

Flow Load

75

active or waiting flow items, on average



Help | Estimate Workload

@LBMKRISHNA

Feature vs Defect vs Risk vs Tech Debt

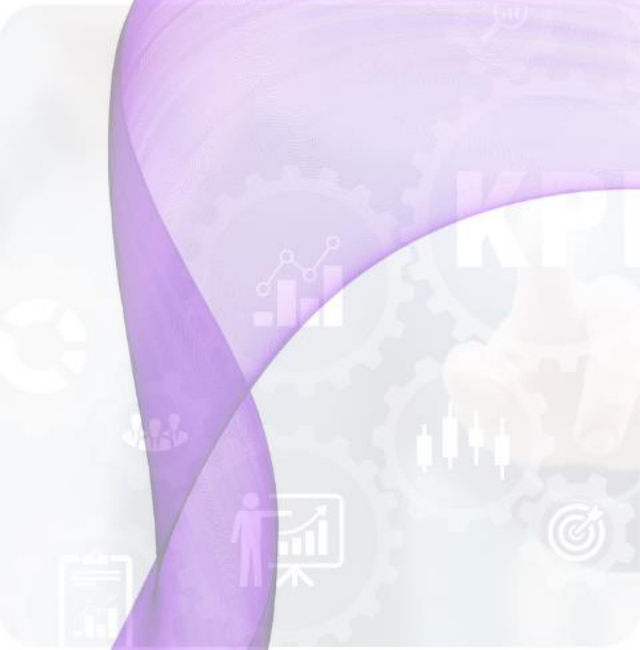
Does it provide the customer/user of this PDVS with a new capability or enhancement? If yes, then it's a feature.

Does it fix or mitigate a problem with an existing feature/capability? If so, then it's a defect.

Does it improve the security of data of the users of this system or address a compliance issue for this product? If so, it's a risk.

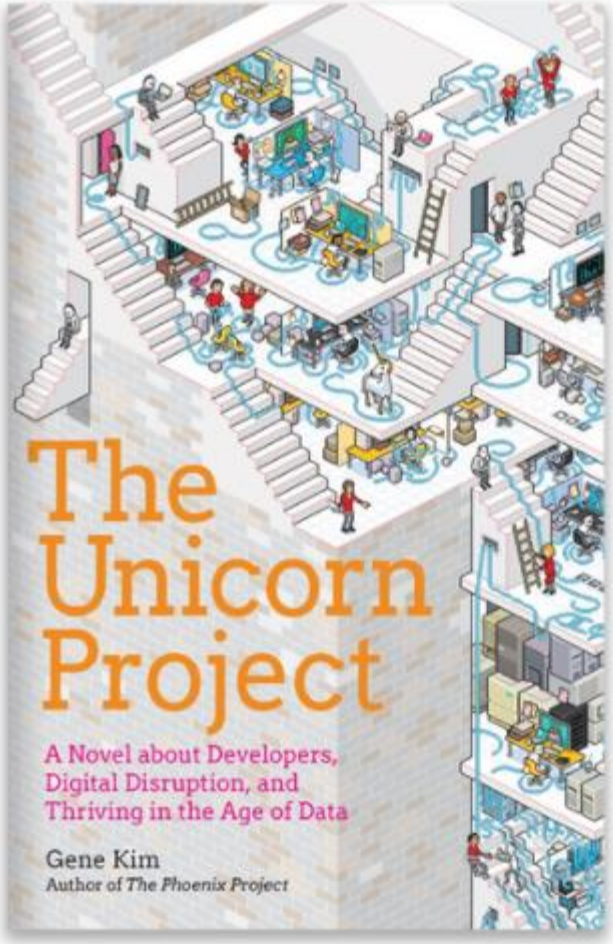
Anything else that addresses the maintainability, supportability or improves the flow of the first 3 items is a debt.

Why
Value Stream?



Why
Flow Metrics?

My Reflection



- The First Ideal: Locality and Simplicity
- **The Second Ideal: Focus, Flow, and Joy**
- The Third Ideal: Improvement of Daily Work
- The Fourth Ideal: Psychological Safety
- The Fifth Ideal: Customer Focus

The most critical metric is: how long it takes for an innovative idea to reach a customer

– Adrian Cockcroft, Vice President of Cloud , AWS
