Culture Shock

BMK Lakshminarayanan

#DevOps without cultural transformation and operations team becomes DevOOps :(

If culture isn’t the first part of explaining DevOps, you’ve missed the point

-John Willis

Responsibility of DevOps is to enable the Business; DevOps is culture change, you cannot directly change culture but the behaviours; change in behaviour becomes culture.

- Production outage is always operations team issue
- Logging Issue vs Fixing Issues
- What is the charge code?
- My resource is key resource and is always busy
- I will do when time permits
- I do not trust
- It is always their fault
- Why I need to change?
- I know how to do my work
- My work important than yours
- Threat, if I automate I might not get $$$

What is wrong with my culture?

A culture is defined as the organisation's pattern of response to the problems and opportunities it encounters.

- Ron Westrum

High-Performance

When you put great people together they do great things.

- Jody Mulkey

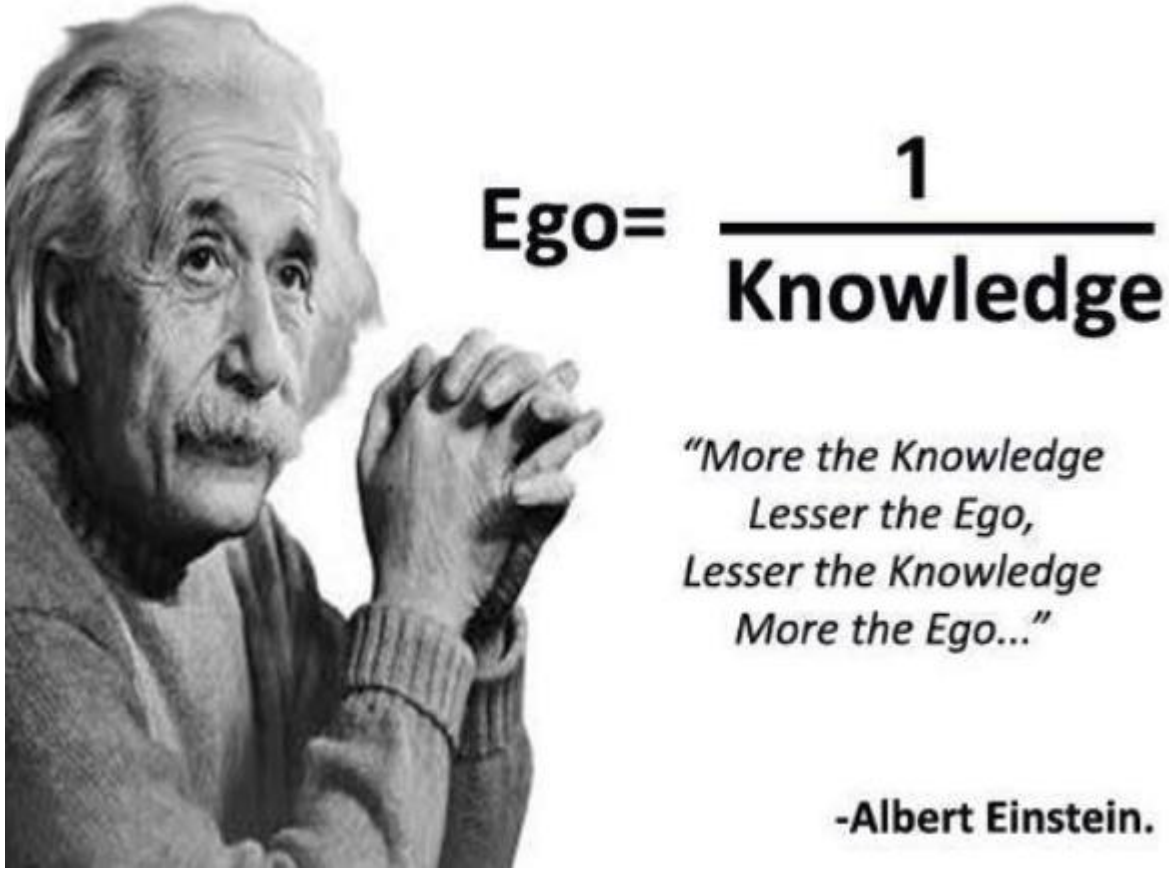
High-Performance

Considering your ability to have a greater impact on an organisation beyond your own job title

High-Performance

Understanding that your job is more than a job, and that you work more than a mere checklist

Attitude for Learning



Ego is force field of learning

Generalizing Specialist

Robert A. Heinlein said it best: "*A human being should be able to change a diaper, plan an invasion, butcher a hog, conn a ship, design a building, write a sonnet, balance accounts, build a wall, set a bone, comfort the dying, take orders, give orders, cooperate, act alone, solve equations, analyze a new problem, pitch manure, program a computer, cook a tasty meal, fight efficiently, die gallantly. Specialization is for insects*."
