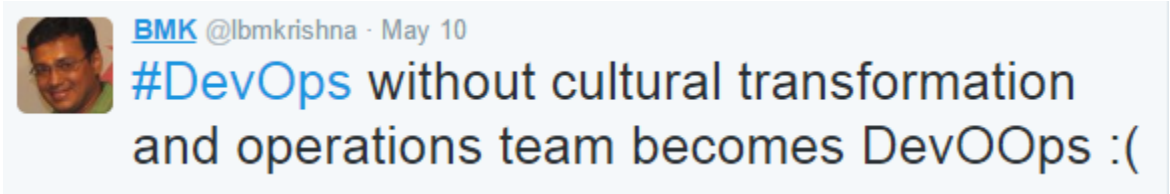
Dev vs Ops => DevOps

an intimate understanding between the development and operations teams



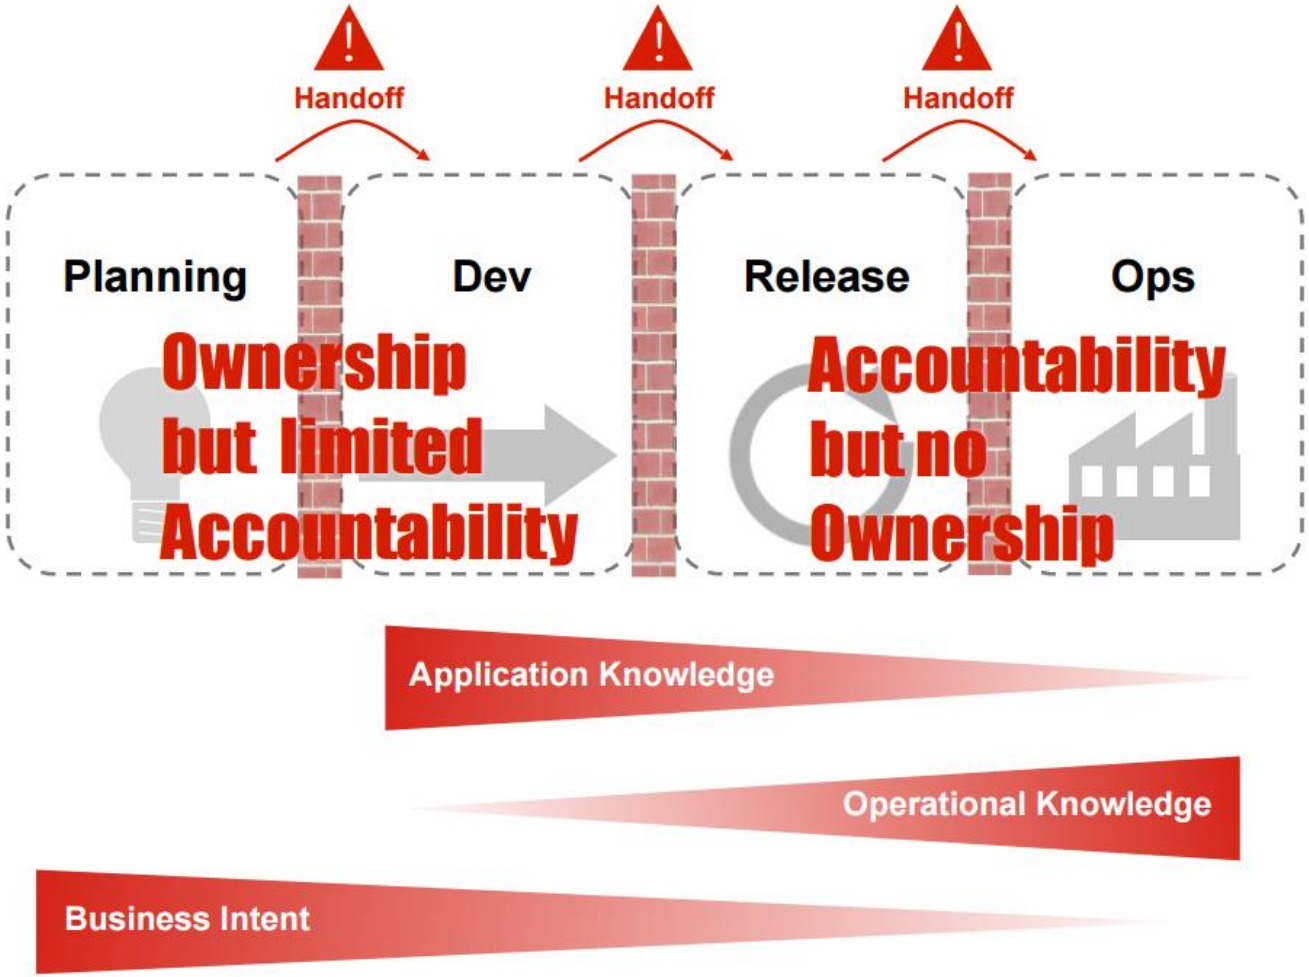
Mercury @DevOps

History

- 2007 | Belgium | Patrick Debois
- 2008 | Toronto | Agile Infrastructure | Agile Conference | Andrew Shafer
- 2009 | San Jose | 10+ Deploys per day Flickr | Velocity | John Allspaw, Paul Hammond
- 2009 | Belgium | DevOpsDays | Patrick Debois, John Willis & others | #DevOps born
- 2010 | US | DevOpsDays | Damon Edwards, Andrew Shafer, John Willis
- 2011 | Gartner Prediction | Cameron Haight | Prediction was DevOps embrace 20% by 2015
- 2012 | DevOpsDays | Bangalore->Boston | Become must-attend events
- 2013 | DevOps Books | The Phoenix Project, Lean Start-up, Continuous Delivery
- 2014 | **Bnz DevOps** | ATM & Windows Team | Automated Deployments with OctopusDeploy
- 2015 | DevOps become mainstream | State of DevOps Report by Puppet Labs
- 2016 | **Bnz DevOpsDays** | Bnz DevOps Community

DevOps movement

- From practitioners, by practitioners
- Not a product, specification, job title
- An experience-based movement
- Decentralized and open to all
- Not usually driven from the top down
- Improves organization efficiency and effectiveness

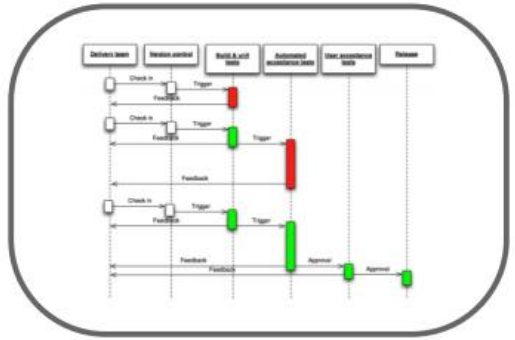


-Damon Edwards

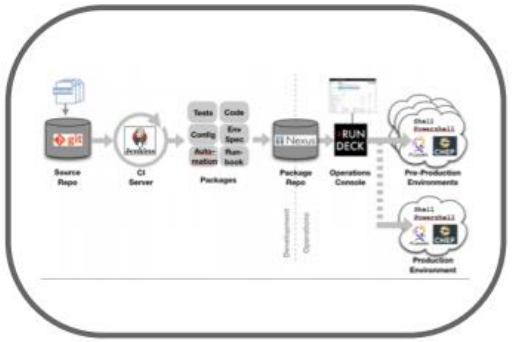
Silos are #1 enemy of throughput and quality

Principles and Practices

- CALMS – Culture, Automation, Lean, Metrics, Share
- Understand the flow
- Reduce cycle time & waste (Lean)
- Work in small batches
- Limit the hands-off
- Test early, often, faster feedback
- Monitor the environment, use tools for APM, collect and understand metric
- .....

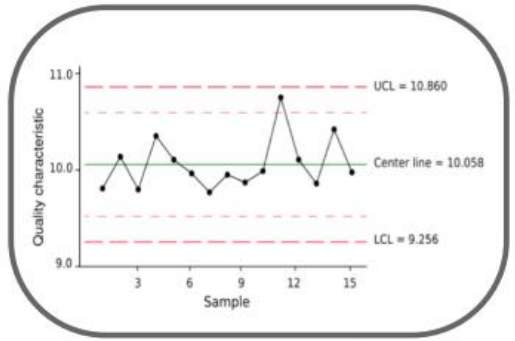


Continuous Delivery

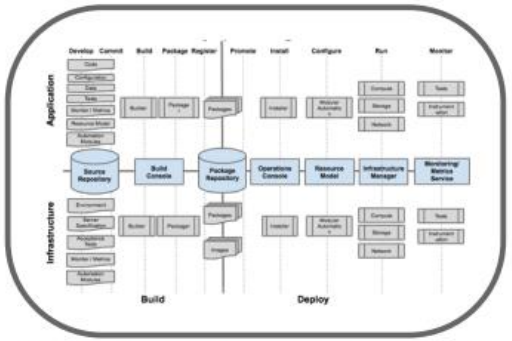


Infrastructure as Code

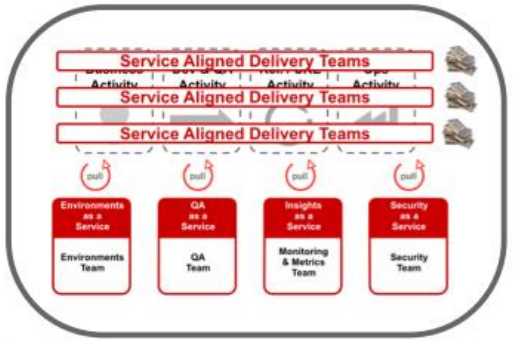
Blameless Post Mortems



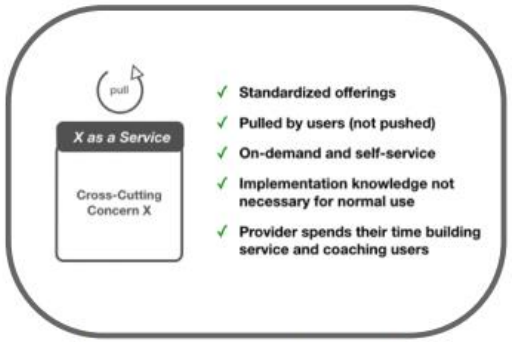
Testing in Production



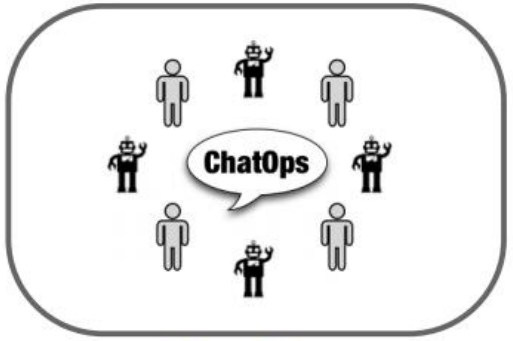
Everything in SDLC



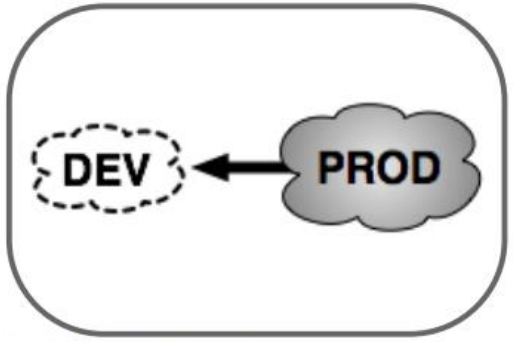
Service Aligned Org



Ops as a Service



ChatOps



Prod-like Dev Environments

The DevOps journey began when Nordstrom ***stopped optimizing for cost****, and instead* ***started optimizing for delivery speed***

-Courtney Kissler

High performance is achievable no matter if your apps are greenfield, brownfield or legacy

- *2015 State of DevOps report*

Bnz DevOpsDays - Next

Monday 29th August 2016
HQ, Wellington

DevOps

COMMUNITY

Welcome to the DevOps Community.

DevOps is the practice of operations and development engineers participating together in the entire service lifecycle, from design through the development process to production support.

It is a cross-disciplinary community of practice dedicated to the study of building, evolving and operating rapidly changing resilient systems at scale.

BNZ DevOps Community aims to provide a collaborative, sharing and learning platform for Development Engineers and Operations Engineers to ask, answer, discuss, feedback, suggest, train and work together in the value chain.
